# Management Team

**MOHINDRA SINGH CHUNDAWAT**  
(Founder & Managing Director)

Mohindra started Rajshree Minerals with a very straightforward goal: to be the most reliable partner in the glass and ceramics space. He knows soda feldspar inside out. Today, he keeps the team focused on building real relationships and making sure clients never have to second-guess their raw materials.

Chotu Singh is the reason our customers sleep well at night. He has a meticulous eye for detail, ensuring every single batch of our soda feldspar powder hits the exact chemical and whiteness specs. If it doesn't meet his strict standards in the lab, it simply doesn't leave our gates.

**Chotu Singh**  
(Purchase and quality management)

**Bablu Singh**  
(Query management and logistics)

Getting tons of material out of the ground and to your factory takes serious coordination, and that's where Bablu Singh helps. He's our boots on the ground. From managing customer queries to coordinating the trucks, he makes sure your feldspar gets milled, packed, and delivered right on schedule.

# Operations

## Mining

Currently, we are operating a total of two quarries of Sodium Feldspar. Both of our quarries are situated in Rajasthan, India. They are strategically acquired and blessed with enormous deposits of high-grade minerals.

## Processing Facilities

We have a total of seven operational plants, Five grinding mills (for fine powder), One disintegrator (for grains), and One Silica Sand washing plant and all these facilities are equipped with latest technologies and located in Rajasthan's state of India.

## Quality Assurance

Quality is a parameter of utmost importance for us. We are always determined and dedicated to supplying assured quality products. All materials are thoroughly checked in our in-house laboratory by our experienced and qualified lab technicians.

## Transportation

Without safe and on-time delivery, all our efforts may go in vain. Thus Rajshree Minerals considers logistics as an important aspect of our business. We have dedicated transport department and also have tie-ups with some reputed logistics companies.

## Sodium Feldspar Mineral:

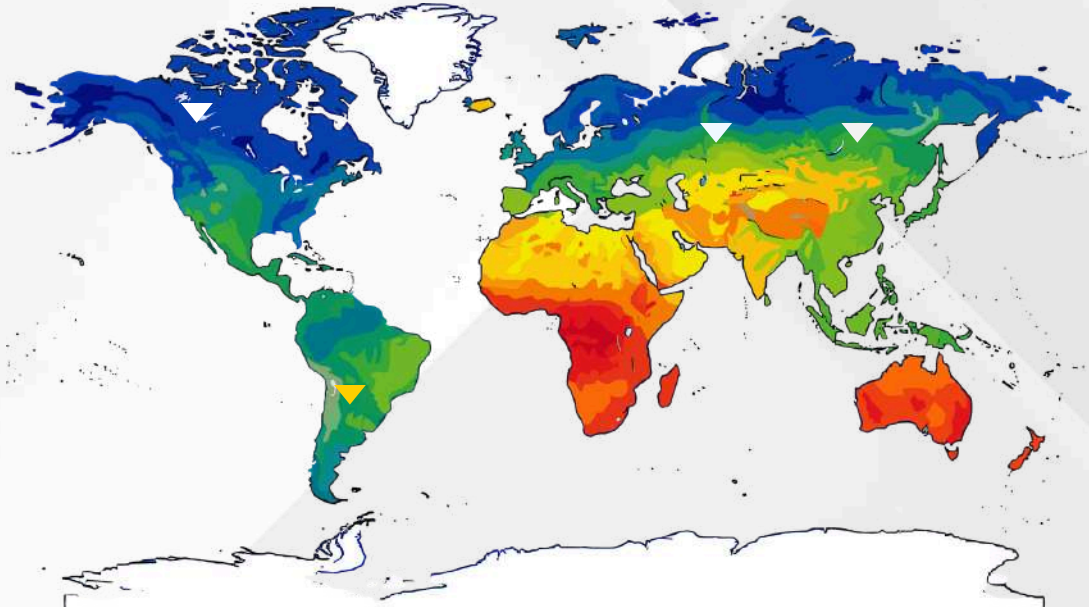

Mostly used in frit, ceramic glaze, glass manufacturing and as fluxing agent in many other industries.

### TECHNICAL DATA SHEET

| PROPERTIES                                     | RS01               | RS02               |
|--|--------------------|--------------------|
| Silica (SiO <sub>2</sub> )                     | 69±1%              | 70±2%              |
